## PROFILE

This individual fully immerses themselves in responsibilities, emphasizing simplicity and authenticity in human connections. Their versatility enables easy adaptation to diverse environments. As an electronic engineer specializing in web development, they channel their passion into crafting elegant and functional websites, showcasing organizational skills and multitasking abilities. Whether exploring new experiences, diving into video games, or getting lost in reading, their positive attitude and commitment to loyalty also manifest in their professional journey. They are dedicated to continuously refining their skills, focusing on ongoing growth in the dynamic field of web development. In summary, this versatile and passionate individual brings the same dedication to both personal relationships and their professional career.

## EDUCATION

### ELECTRONIC ENGINEERING

Feb 2017 - Jun 2022

Universidad de la Costa, Barranquilla

### DIPLOMA IN PROJECT MANAGEMENT

Nov 2021 - Jan 2022

Univesidad de la Costa, Barranquilla

## EMPLOYMENT

### Electronic engineering

Jan 2022 - Aug 2023

COVEIN SPEED, GROWTH & CONTROL, Barranquilla

- **Maintenance and Inspection:** I developed and implemented effective strategies for preventive and corrective maintenance of frequency inverters, ensuring operational continuity and minimizing downtime.

**Sales and Technical Consulting:** I successfully managed customer requests by providing detailed technical advice and formulating customized offers for maintenance services and the sale of Danfoss equipment and instrumentation.

**Customer Management:** I maintained strong relationships with clients in various sectors such as food, metallurgy, chemical treatment, shopping centers, and corporate offices, understanding their needs and providing tailored solutions, resulting in a significant increase in sales and customer satisfaction.

**Coordination and Operational Efficiency:** I closely collaborated with internal departments to ensure operational efficiency in project execution, from customer requests to the final delivery of services.

### **Electrical Installations Supervisor**

Jan 2021 – Jan 2022

JGL INGENIEROS SAS, Barranquilla

- **Design of Electrical Installations:** I led the comprehensive design of low and medium voltage electrical installations, ensuring efficient implementation and strict compliance with technical and safety regulations.

**Billing and Project Settlement:** I diligently supervised the entire process of billing, settlement, and project closure, ensuring accuracy and transparency in financial documentation. This contributed to the effective financial management of the projects.

**Project Management:** I effectively coordinated all stages of electrical projects, from planning to execution, ensuring on-time delivery and adherence to the allocated budget. My meticulous approach resulted in the successful execution of highly complex projects.

**Fieldwork and Adaptability:** I demonstrated a notable willingness to perform fieldwork, playing a key role in the team's success, especially in situations with limited personnel. Working under pressure not only strengthened my skills but also facilitated quick and efficient learning, consistently leading to outstanding results.
